

SolarTech provides excellent protection against corrosion, chemical attack, abrasion and many forms of aggressive environments.

Info

SolarTech UV curing sheet laminates have proven global service history, with many years of successful performance, providing the ability to offer seamless protection and ease of application has attracted many clients to use the SolarTech technology.

SolarTech sheet laminate is supplied fully complete, needing no other additives or curing agents, and is ready for use. The material can be cut to any size using knives or scissors.

SolarTech's versatile UV curing mechanism allows for variations from minutes to hours, depending on site conditions, in achieving full cure.

Products

UV curing composites

SolarTech is a pliable (soft) material that is installed to cover and protect the insulation system. It will stay pliable as long as it is not subject to direct U.V. (Ultra Violet) light. The material is made up out different layers.

Plastic film Resin rich layer "C" Glass Veil "E" Glass mat Resin rich layer Plastic film

- Solar Tech Sheet Laminates
- **Solar Seal** Liquid Primers & sealing resins
- Solar Fill Pastes & Fillers
- Solar Coat Resin

Single Component Quick Unique UV Curing → Fireproof (Class 1 rating) Versatility in Application Potable Water Approved Excellent Corrosion Resistance High Impact Strength Easy to Apply

Benefits

INSULATION PROTECTION Easily applied to all forms of insulation providing waterproofing and impact resistance

PIPE/CORROSION PROTECTION Easily applied to all forms of insulation providing waterproofing and impact resistance

PHARMACEUTICAL PLANTS Easily applied to all forms of insulation providing waterproofing and impact resistance

FOOD INDUSTRIES Easily applied to all forms off insulation providing waterproofing, tough durable and very easy to clean insulation

OFFSHORE INSULATION PROTECTION

Application on large areas is simple with the product having excellent adhesion to a wide range of substrates and high flexural strength, lightweight fire resistant system

CRYOGENIC UNITS Withstands temperature changes, weathering and ultra violet degradation

CHEMICAL STORAGE TANK PROTECTION

Excellent chemical resistant properties make it ideal for use in the protection of chemical storage tanks

TANK ROOFS

Waterproofing of large areas is simple with the product having excellent adhesion to a wide range of substrates and high flexural strength

Productivity Sheathing SolarTech sheet laminates to steel pipes sections

UNDERGROUND PIPING Providing a tough durable, abrasion, resistant and corrosion proof system

UNDERGROUND PIPING

Providing a tough durable, abrasion, resistant and corrosion proof system even under high abrasion and wet environments

CONCRETE PROTECTION Chemically resistant to a wide range of acids, seawater, etc

PIPE SUPPORT Has immense strength and durability

INTERNAL OF STORAGE TANKS With the use of artificial UV source the product is easily cured in areas where natural UV is not available

ank you for your time
